

TRAINING PROGRAMME

Scrum Alliance Certified Scrum Master® (CSM®)

I. Training outline

- Safe to say, Scrum is the most widespread framework for agile product development. This training offers the basic but complete knowledge and experience of the framework, while adhering to the strict requirements of the Scrum Alliance for the quality of delivery
- By comparison with other approaches Scrum Alliance offers an understanding of Scrum that is holistic and all encompassing and at the same very flexible, with the possibility of application across any organisation and in many contexts
- This training has a good balance of Scrum and Agility concepts with practice
- The training is set on-line, with a practical, hands-on learning approach

II. Target group

- Anyone interested to learn about the use of Scrum for complex product development and software development
- Anyone enthusiastic about becoming a Scrum Master and understanding better the accountabilities and stances of a Scrum Master
- Anyone willing to revive their Scrum Master practice

III. Benefits

- The discovery of the most widespread agile framework
- Learning a flexible approach that is useful not just in the IT quarter but across the board
- Learning from experts and peers through interaction and exchange, with a practical, hands-on approach
- Approachable certification with a clear professional development path
